SPRINGER NATURE

Products, Services & Solutions

ADVANCING
DISCOVERY

About Springer Nature

Springer Nature advances discovery by publishing trusted research, supporting the development of new ideas and championing open science. Our journals, eBooks, databases and solutions make sure that researchers, students, teachers and professionals have access to important research.

Springer

Established in 1842, Springer is a leading global scientific, technical, medical, humanities and social sciences publisher. Providing researchers with quality content via innovative products and services, Springer has one of the most significant science eBooks and archives collections, as well as a comprehensive range of hybrid and open access journals.

Nature Portfolio

Publishing some of the most significant discoveries since 1869. Nature Portfolio publishes the world's leading weekly science journal, *Nature*, in addition to Nature-branded research and review subscription journals. The portfolio also includes Nature Communications, the leading open access journal across all sciences, plus a variety of Nature Partner Journals, developed with institutions and societies.

Academic journals on nature.com

Prestigious titles in the clinical, life and physical sciences for communities and established medical and scientific societies, many of which are published in partnership a society.

Adis

A leading international publisher of drug-focused content and solutions. Adis supports work in the pharmaceutical and biotech industry, medical research, practice and teaching, drug regulation and reimbursement as well as related finance and consulting markets.

Apress

A technical publisher of high-quality, practical content including over 3000 titles for IT professionals, software developers, programmers and business leaders around the world.

Palgrave Macmillan

Publishing award-winning research across the humanities, social sciences and business for academics and professionals. Palgrave Macmillan offers the very best in academic content and supports the scholarly community with innovative formats and tools.

Scientific American

The leading source and authority for science and technology in the general media. First published in 1845, *Scientific American* is the longest continuously published magazine in the US. Including articles from over 150 Nobel Prize scientists, it has built a loyal following of influential and forward-thinking readers.

SCIENTIFIC
AMERICAN

BioMed Central

A pioneer of open access publishing, BMC has an evolving portfolio of high quality, peer-reviewed journals. BMC is expanding beyond biomedicine into the physical sciences, mathematics and engineering disciplines, and now offers a wider portfolio of subject fields on a single open access platform.

 BMC

Journals

Nature Portfolio journals

Nature

No. 1 weekly international science journal

First published in 1869, *Nature* is the leading weekly interdisciplinary science journal. It contains some of the most important and influential papers across all areas of science and technology.

Publishing ground-breaking research whilst maintaining a rigorous editorial process has resulted in *Nature* being the most highly-cited multidisciplinary journal. Focusing on the needs of scientists, *Nature* continues to inspire and inform researchers, clinicians, academics and industry experts worldwide.

 nature.com

Nature-branded research and reviews journals

Leading original research and reviews across the life, physical, clinical and social sciences

32 research titles with dedicated News & Views and Commentaries and 20 reviews titles written by leading researchers, providing a thorough summary of primary research in the field.

Nature archive

For 150 years, *Nature* has published some of the most important and research in science. Get every *Nature* article ever published with the added benefit of today's technology – search easily through decades of ground-breaking research, and find key terms and link topics in seconds.

There are 4 *Nature* archive sets available:

- Volumes 1-164 (Nov 1869-Dec 1949)
- Volumes 165-324 (Jan 1950-Dec 1986)
- Volumes 325-384 (Jan 1987-Dec 1996)
- Volumes 385-445 (Jan 1997-Dec 2006)

 nature.com

Academic journals on nature.com

[nature.com](https://www.nature.com)

Leading research in the clinical, life and physical sciences for scientific communities

36 prestigious academic journals and 10 additional open access academic journals, many of which are published in partnership with established medical or scientific societies and institutions.

Springer journals

link.springer.com

Including over 2,400 English and 150 German language journals across all sciences

The leading source for high-quality content across all research disciplines.

The global authorship of these journals encourages interdisciplinary research supporting scientists, researchers and academics in developing their knowledge and advancing discovery.

Springer journal archive

link.springer.com

More than 2 million articles from over 1,000 journals, going back to volume 1, issue 1

Adis journals

[springer.com/adis](https://www.springer.com/adis)

A premier collection of drug-focused medical journals and newsletters across the medical, biomedical and pharmacological areas

20+ drug-focused medical journals and newsletters essential for healthcare practitioners and researchers.

Palgrave Macmillan journals

[palgrave.com](https://www.palgrave.com)

Scholarly journals across business & economics, humanities, and the social sciences

Publishing dynamic academic journals for together the best in steadfast, thought-provoking academic research emphasizing on policy, application and social impact.

Scientific American

Open research

Open research is core to Springer Nature's mission. We offer researchers, institutions and their funders open access options for journals, books and sharing research data. We make academic research freely accessible and discoverable through partnerships, innovation and collaboration with research communities.

BMC

A pioneer of open access publishing, BMC has an evolving portfolio of high quality, peer-reviewed journals. BMC is expanding beyond biomedicine into the physical sciences, mathematics and engineering disciplines, and now offers a wider portfolio of subject fields on a single open access platform. All articles published by BMC are open access and freely available online immediately upon publication.

[biomedcentral.com](https://www.biomedcentral.com)

SpringerOpen

SpringerOpen provides researchers from all areas of science, technology, medicine, humanities and social sciences with a place to publish open access in journals and books. Publishing with SpringerOpen makes your work freely available online immediately upon publication.

[springeropen.com](https://www.springeropen.com)

Nature Portfolio

Open access models and open research policies have long been at the heart of Nature Portfolio. Combining rigorous peer-review, editorial excellence and technological innovation, Nature Portfolio open access journals make the highest quality research more visible, shareable and citable.

[nature.com/openresearch](https://www.nature.com/openresearch)

Palgrave Macmillan

Palgrave Macmillan offers the option to publish open access across all publication formats: journals, monographs, and Palgrave Pivots (mid form monographs). We were one of the first publishers to offer an open access option for the humanities and social sciences and remain an active participant in the development of sustainable models for open access for these disciplines.

Featuring podcasts, videos, blogs and more, scientificamerican.com connects hot topics across the sciences, mind, health, tech, sustainability and education.

 [scientificamerican.com](https://www.scientificamerican.com)

Springer Nature advances discovery by publishing robust and insightful research, supporting the development of new areas of knowledge and making ideas and information accessible around the world.

Marie Curie (1867–1934)

In a scientific world still dominated by men, Marie Curie shone not only as an extraordinary pioneer in the field of radioactivity, but also as a trailblazing female scientist. A French-Polish chemist and physicist, Curie discovered two new elements, polonium and radium, and revolutionised our understanding of radioactivity, the process by which unstable atoms decay by emitting energy in the form of radiation. The first person of either gender to win or share two Nobel Prizes, Curie is one of the most renowned scientists of a generation whose influences can be seen throughout many areas of modern science, from particle physics to medicine.
